

## University of Szeged

The University of Szeged (SZTE) is one of the most popular universities of Hungary, occupying high places in all the international rankings. The number of its academic research and teaching staff reaches 2300 teaching and training up to 25 000 students. It has been considered for years as one of the world's best 500 universities and it is known as a green institution. It offers a broad range of educational opportunities to home and foreign students. The University of Szeged is committed to helping students to make the most of their talents and abilities. Research, Development and Innovation activities of the institution are acknowledged internationally and the University is in partnership with numerous industrial enterprises and companies such as the ELI-ALPS Laser Research Centre, one of the largest scientific investments in Europe. Located in southern Hungary, the University of Szeged is a leading workshop of education, science, research, innovation and it has a crucial role in the region's cultural, social and economic activities.

## Directorate for R&D and Innovation

The Directorate for R&D and Innovation works as an interface between the academic community at Szeged and external collaborators in both the public and private sectors. The objective of the Office is to stimulate the creation of intellectual property and manage the resulting assets in support of the mission of the University of Szeged: to provide the best possible educational experience for our students through excellence in teaching, research and creative activity, and service to the state and society.

Since the foundation of the Directorate and implementation of the intellectual property management policy, research activities of the University have intensively improved. The number and quality of its publications and patents are remarkable not just at national level, but also at international level. In 2016 the IP portfolio of the University consists of nearly 50 patent applications.

Our mission is to facilitate, advocate and collaborate with the Faculties, Staff and Industrial Partners to support an environment for inventions and innovation at the University of Szeged by transferring and commercializing the University's intellectual assets into benefits for our region and the public good.
