Ceva Santé Animale has been among the 10 fastest growing animal health companies in the first 10 years of its existence. Now we are the 7th biggest animal health group in the world, although the company was founded only in 1999. Our expertise is concentrated in two areas, manufacturing pharmaceuticals and biologicals. Our committed teams work in these areas, to satisfy the specific demands of the pet, poultry, ruminant and swine sectors. We constantly strive to find better solutions for known and new diseases, enhancing the health and fertility of the animals.
