Omixon is a global molecular diagnostics company, headquartered in Budapest, Hungary, with US offices in Cambridge, MA that commercializes disruptive technologies for clinical and research laboratories. Omixon's flagship product, Holotype HLA™, is the world's leading NGS-based HLA genotyping product that delivers the most accurate high-resolution HLA genotyping available, and is used in more than 20 hospitals worldwide. Omixon's research software, HLA Explore™ analyzes data from any sequencing technology and determines HLA genotypes from Whole Exome/Genome Sequencing experiments. Omixon maintains an active grant-funded research program with a product pipeline focused on pre- and post-transplantation, and HLA genotyping applications beyond transplantation.

COMPANY MILESTONES

In 2009 we just had a roadmap, ideas and plans to develop a global molecular diagnostics company in the field on Next Generation Sequencing. We managed to find out our direction and have become a significant player on the HLA-typing market.
