Helping French companies export and foreign companies set up business in France

<p style="text-align: center;">ACTINI</p> <p style="text-align: center;"></p> <p style="text-align: center;">www.actini.com</p>	<p>Since 1953, ACTINI has been designing, manufacturing and marketing liquid heat treatment equipment. Its know-how in thermal transfer technologies and numerous processes developed and patented by the company, now allow ACTINI to be a major player in the business of effluent decontamination.</p> <p>ACTINI offers a complete range of equipment designed to meet the needs of contained laboratories and bio-industries handling biohazardous liquids classified as BSL-1 to 4. Validated by major vaccine manufacturers and high contained labs – with more than 200 operational units worldwide –, ACTINI supplies a wide range of capacities of batch or continuous effluent decontamination solutions (from 70 to 180,000 liters per day). And being specifically designed to meet the requirements of industrial and laboratories using pathogens rated BSL1-2-3-4.</p> <p>Its capacity for innovation combined with technical expertise and historical knowledge allowed them over the years to offer high-efficient solutions.</p>
<p style="text-align: center;">CELSIUS</p> <p style="text-align: center;"></p> <p style="text-align: center;">www.celsius-process.com</p>	<p>CELSIUS manufactures process equipment for chemical industry, delivered in turn key packages.</p> <p>The main product is the “energy skid”, which purpose is to manage the process temperature in a synthesis reactor, filter dryer or dryer. The advantages of this technology are:</p> <ul style="list-style-type: none">• reducing the heating and cooling time: more production time for users• managing more accurately the process temperature: better product quality• better management of exothermal reactions: secure the plant• avoiding corrosion in reactors: saving investment• turnkey equipment in packages: reducing costs and time on plant site <p>CELSIUS turnkey equipment are built, in accordance with  European Directives PED and ATEX, in its own factory, in conformity with customer’s requirements and with CELSIUS own design.</p>

Our partners:

<p style="text-align: center;">CURIUM</p>  <p style="text-align: center;">www.curium.world</p>	<p>Expert in the management of high environmental risks since 1994, CURIUM has positioned itself among the leaders of the management of hazardous chemical products. CURIMUM's activities are as follows:</p> <ul style="list-style-type: none"> • Decontamination • Emergency response unit • Management of gas processes • Support in projects management • Depollution <p>CURIUM has a large expertise for decontamination operations in the pharmaceutical field and white rooms and offers turnkey solutions: from diagnosis and contamination mapping to decontamination operations and validation. It comprises:</p> <ul style="list-style-type: none"> - Diagnosis and contamination study - On site contamination mapping - Set up of decontamination procedures and safety measures to take - Decontamination works - Decontamination validation and reporting
<p style="text-align: center;">ERLAB</p>  <p style="text-align: center;">www.erlab.com</p>	<p>Erlab's passion is innovation, invention and safety. They focus on research & development, design, and manufacturing of cutting-edge filtration solutions for the protection of laboratory personnel. As an innovator, Erlab is committed to safety, performance, energy efficiency and sustainability and has remained the world leader for ductless and filtering fume hoods since 1968. Erlab is offering a global solution around SMART technology: an innovative real time monitoring technology for ductless filtration fume hoods, filtered storage cabinets, laboratory air purifiers, air quality sensors, etc...</p>
<p style="text-align: center;">FRANCELAB</p>  <p style="text-align: center;">www.francelab.hu</p>	<p>Francelab is representing in Hungary high technology instruments and goods from mainly French manufacturers for the Pharmaceutical & Biotech industries. Our range of equipments and products include :</p> <ul style="list-style-type: none"> • Production equipments for powders, liquids, pastes and biotech • Process products: tubings, hoses, connectors, valves,... • Packaging materials: stoppers, caps • Biological Products • Analytical instruments (Raman, AFM, particle size analyzers, ...) • Microbiological instruments (H2O2 decontamination, centrifuge, ...)

Our partners:

<p style="text-align: center;">GSE GROUP</p>  <p style="text-align: center;">www.gsegroup.com</p>	<p>GSE Group was created in 1976, pioneering a new concept, Design & Build contracting. This concept consists in taking the total responsibility of building a project from the beginning to its delivery. The principle of design and build contracting integrates a commitment on results in terms of Price, Deadlines, HSE, Quality and Sustainability.</p> <p>GSE, as an engineering company :</p> <ul style="list-style-type: none"> • Understand the customer’s operational stakes, • Identify constraints linked to the process , • Organize the real estate project around the process, • Optimize coordination between process and building, • Provide transparency during the whole project development.
<p style="text-align: center;">ISOVATION</p>  <p style="text-align: center;">www.isovation.com</p>	<p>ISOVATION has gathered together a team of top specialists in packaging and cold chain technology. We created the first foldable, insulated (isothermal) box to be available in the French market.</p> <p>ISOVATION offers innovative isothermal solutions that guarantee a constant controlled temperature (negative or positive cold) for temperature-sensitive products during all stages of transport and irrespective of the external conditions.</p> <p>ISOVATION develops efficient systems for the cold chain in partnership with leading organisations that include pharmaceutical and biotechnological companies, hospitals, food producers, and transportation and logistics companies.</p>
<p style="text-align: center;">JB TECNICS</p>  <p style="text-align: center;">Expert in plastics applications</p> <p style="text-align: center;">www.groupejbt.com</p>	<p>JB TECNICS is expert in plastics applications: design, moulds manufacturing, plastics injection.</p> <p>JB TECNICS’S VISION :</p> <ul style="list-style-type: none"> • Being the valuable and reliable partner for performance plastic products • Build a partnership based on the confidence <p>JB TECNICS’S STRATEGY :</p> <ul style="list-style-type: none"> • Global project management <i>‘from idea to mass production’</i> • Local manufacturing plant • Upmost know how and technologies dedicated to our customers • Management of IQ-OQ-PQ Qualifications.

Our partners:

<p>MOM-PACKAGING</p>  <p>www.mom-packaging.com</p>	<p>MOM-PACKAGING is a manufacturer of filling, dosing and plugs for powders and liquids. It is a French independent company founded in 1927, MOM designs and manufactures its machines at its factory in Villepinte, near Paris Charles de Gaulle Airport. It specializes in powders and liquids and offers you 85 years of experience to give its clients the best solutions.</p> <p>The company offers solutions to a wide range of industry from food, chemical, pharmaceutical to toners and the alcohol industry.</p> <p>For every market they serve, MOM-packaging complies with the specific and demanding needs of its customers.</p>
<p>SNDI, Elis group</p>  <p>www.cleanroom.elis.com</p>	<p>For nearly 50 years SNDI has been supplying garments and appropriate cleaning service to companies operating in cleanroom and sterile areas.</p> <p>Their product range covers coveralls, coats, hoods, overshoes and undergarments made of specific fabrics (microfibers for undergarments and validated continuous filament fabric for other cleanroom garments). Some of their products are patented (eg: PA coveralls and Goggles)</p> <p>An internal R&D Laboratory selects the fabrics and improves garment design.</p> <p>They ensure an appropriate cleaning for use in Class A/B and C/D. Associated sterile treatment is done either by autoclaving or gamma irradiation.</p> <p>SNDI operates 13 cleanroom laundries in France, Switzerland, Belgium, Spain, Italy and Czech Republic, all of them are ISO 9001 certified. Nearly 1000 customers are served in 14 European countries by their own vans and drivers from these dedicated plants. 70% of SNDI's business is generated by pharmaceutical and medical device companies.</p>

If you need any further information about these companies, we would be pleased to send you more details upon request.
